

Laura-

Here are the items that are missing from the Draft Technical Report, Environmental Consequences - Recreation Resources (Dec. 1997 version).

1. Is there information that needs to go in the existing conditions and no action columns in Table 12, Summary of Recreation Impacts in the Bay Region, and Table 13, Summary of Recreation Impacts in the Sacramento & San Joaquin River Regions? (both tables are attached)
2. Mitigation strategies are needed for the Fish, Wildlife and Recreation Economics section.
3. Missing a program alternatives to no action alternative comparison for San Joaquin River region.
4. Missing a program alternatives to no action alternative comparison for SWP & CVP services areas outside the central valley.
5. Missing comparison of program alternatives to existing conditions sections. The sections that are missing are delta region, bay region, and Sacramento River region. If the differences are similar to the no action alternatives, then just write a paragraph that states that. I attached an example of a paragraph that was written for the Noise technical report where the differences were similar to the no action alternative.
6. Missing text for the Fish, Wildlife, and Recreation section under "Potentially Significant Unavoidable Impacts."
7. What is the complete reference for California State Parks 1997? (See attached page.)

Please send the information to Ray McDowell at CALFED. His number is (916) 653-9499 and his E-mail address is raymac@water.ca.gov. If you can send the information electronically that would be helpful.

Thanks,

Leslie Millett
